The new State Road law gives towns with our valuation the right to raise anywhere from \$1.00 to \$533.00. It ought to be fully understood that this State aid road work comes wholly under the supervision of the State Inspector, and settlements are made wholly through his recommendations. It does not matter if we like his method or not, he is the party that has to be satisfied — last year you voted for something you knew nothing about, and went the full limit. If experience has taught anything, we are most certainly wiser about State Roads than a year ago.

REMARKS

At the special Town Meeting held in Town Hall April 7, 1913, it was voted to build a new school building on Little Cranberry Island, and the following committee appointed: Leslie R. Bunker, Walter Hadlock, John D. Phippen, John E. Bunker, and John H. Pressey. Said committee organized at once, Leslie R. Bunker was chosen chairman and John E. Bunker, secretary. We at once had plans sent from the office of the State Supt. of Schools; these plans were on a very expensive scale and we found them of no value to us. After looking about for a time and not finding plans to our satisfaction, it was decided to have plans drawn according to our own ideas. Two sets of plans were drawn by two different architects, with the understanding that we would buy the set most satisfactory to the committee. The plans of Arthur Richardson were accepted and the sum of \$30.00 paid for same. At once we called for bids from the reliable building contractors in the County. At the time stated we had six bids, and accepted the bid of the lowest bidder, Robie M. Norwood of Southwest Harbor, contract price \$3,541.00. Work was commenced at once and building finished within contract time in season for winter term of school. George H. Gilley & Son being the lowest bidders for heating system, the contract was given them at the price of \$307.00. Both contractors, Norwood and Gilley, lived up to their specifications in every detail, and we have as good a building as the average person could wish. Your committee has tried to be faithful to its trust and responsibility, and ask to be relieved from any further obligation.

(Signed) LESLIE R. BUNKER

Chairman Building Committee.

REMARKS

The Town Hall has been let 17 times the past year at the usual price, \$3.50 each time. It was found necessary at the commencement of the year to buy more seats and the settees ordered from Oren Hooper Sons, Portland, seem to give general satisfaction. We would recommend buying six more the coming year, and an article has been placed in the warrant to that effect. It was found necessary to have the lighting system overhauled and put in proper condition. Since paying for the outside fire escape from the Hall account, it has been impossible to balance this account.

REMARKS

Mrs. Catherine Mitchell has been cared for, the past year at the home of Mrs. Emma E. Birlem, at a cost of \$6.00 per week, for board. Mrs. Mitchell at the present time is very feeble. We are satisfied she has had good care, and everything is done to make her as comfortable as possible. We have placed one little girl in the Industrial Home at Hallowell, and arrangements are being made to place the other children of the family in the Children's Homes at Bangor and Augusta. The trustees of the Hallowell home will do everything in their power to give the little girl the advantage of a good education and proper bringing up. As she does not in any way come under the criminal class, favors will be shown her that others do not enjoy. People of common sense must wake up to the fact that these same conditions we are going through at the present time must not be allowed to happen again in our town. Humanity demands better conditions, and we, as a whole must live up to them.

We would recommend raising the sum of \$500.00 for the support of the poor this coming year.

SELECTMEN'S REMARKS

We have tried to give you a good, clean report, made up in such a way that it may be understood by all. The past year has been the busiest year in the history of Cranberry Isles — More money paid in, and more money paid out than ever before, and this was made possible in the building of the new school building at Little Cranberry Island, and the State aid road on Cranberry Island. The new law in regard road commissioners takes this matter out of our Town Meetings, and they must be

appointed by the Selectmen. The towns of Cranberry Isles and Mt. Desert, have united in purchasing weights and measures, Cranberry Isles paying one third of the cost of the outfit. We have the use of these weights and measures at any time. We have been advised by the State's Department that it would be better to appoint one sealer for both towns. The Selectmen have placed the tax account of the collector, James C. Crosby, in the hands of an attorney-at-law, and we believe a settlement will be made in a reasonable time. An article in the warrant to see if the town will vote to bring suit against James C. Crosby and bondsmen will be fully explained in Town Meeting.

Respectfully submitted

TO THE VOTERS OF CRANBERRY ISLES

Having served you to the best of my ability—10 years on the Board of Selectmen, (8 years chairman), four years, Superintendent of Schools; fire years, town agent, and auditor of accounts, and seven years moderator in your town meetings, I take this opportunity to thank you, one and all, for your kindness in bestowing upon me these honors and trusts, and responsibility—And, although I do not want to seem ungrateful to my friends and supporters, the time has come when I must say that under no consideration am I a candidate for re-election on the Board of Selectmen.

Yours very truly,

WARREN A. SPURLING, Chairman

MRS. JENNIE A. STANLEY, Secretary

Cranberry Island

During the past year the schools have been practically under the supervision of the Superintendent of Schools, a few suggestions being given by the Superintendent School Committee. The chairman of the Committee has attended to the fuel.

The teachers have been provided with all necessary books and school supplies have been furnished as generously as the money to be expended for those things would permit.

A system of grading has been established similar to that of Bar Harbor schools. This system of grading can be more successfully taught another year, as some time is required for parents, teachers and scholars to understand the advantages of such things.

the eyes, ears, nose and throat were thoroughly examined by Dr. Geo. Neal.

The Sutton school has been discontinued throughout the year as arrangements were made to educate the scholars elsewhere at no additional expense.

Necessary repairs have been made on all the school buildings, except at Sutton Island.

It would be well for the town to raise a sum of \$1200 for the common school expenses next year. There are outstanding bills, not now due, that amount to \$45.00. The money received from the State next year may be less, as there will not be as many scholars to draw school money. The State gave this year to the common school fund, a sum of \$85.00, which, if it is given at all, will be given next year to increase the school year or the teachers' wages.

It is good policy to keep increasing the repair and cleaning account, year by year.

A sum of \$50.00 is needed to be expended in appliances and utensils. This year there was not money enough to supply the scholars with supplies such as other scholars are enjoying.

REPORT OF SUPERINTENDENT OF SCHOOLS

Last spring, before the beginning of the spring term, I inspected the school rooms, most especially the teachers' desks, to learn under what system the teachers had been teaching. I found nothing to enlighten me. Accordingly I secured a copy of the outline used in the Bar Harbor schools from Supt. Palmer. Some of the text books used are the same as those mentioned in the outline, therefore it has been easy for the teachers to follow it profitably.

Grading the Islesford school was quite a problem. During the spring and fall terms, there were eight grades, and a Sub. Primary in the school. But by careful and proficient teaching it was accomplished. When the pupils entered the new building they were, in every respect, up to good thorough grading.

Some new books were bought, and have received good usage by practically all of the scholars, there being only one book damaged. Some of the old books are in poor condition, but were good enough to use this year, but will have to be replaced next year. Some books were sold. They were not very valuable, but were too good to throw away.

Commercial Geography was put into the eighth grade and I think every pupil in Cranberry Isles has taken an interest in the new study. They have also received instruction in algebra. Music and drawing has been successfully taught in the schools on Cranberry Island, where considerable talent has been shown in both. In Islesford the children were taught drawing all of the year with equally good results. Music was introduced the winter term with satisfactory results. The teachers have a fair understanding of these subjects, and have taught them in connection with their regular work.

Two blackboards were bought for the old Islesford building. At the end of the fall term they were transferred with two old ones to Cranberry Island. The new ones were put into the grammar room and the old ones into the primary room.

The new building at Islesford is an attractive one of modern architecture; a building of which Cranberry Isles may be proud. The money thus expended is not wasted, as the scholars take pride in keeping it without a scratch. They also respond readily

to the better advantages that the new building offers them. Most of their immediate needs have been supplied. Next year all they will need is a flag and a box of maps. The bell needs to be hung.

The school building at Cranberry Island has been unnecessarily knocked and damaged. Not all has been done this year, however. In most cases it is done without much forethought.

The heating system in the Cranberry Island school building needs to be changed. Besides the unsatisfactory results obtained from such a furnace, in regard to heating, is the unsanitary arrangement of the cold air draft. The cold air is taken from the primary room.

The only way to ventilate the room is by means of the doors and windows. Therefore two ventilating flues containing pure air are needed, one in each room.

There is no place to pack away the books during the long summer vacation. The books would last longer if suitable closets were built in each room.

Only one water tank is provided. Complaints have come to me about scholars throwing water in the hall. This could be eliminated by putting a water tank into each room, having a wastepipe empty into a barrel in the basement. This would enable the Superintendent to establish individual drinking cups.

The flagpole at Bakers' Island needs to be repaired. The school there is small, but rapid progress has been made there this year.

MRS. JENNIE A. STANLEY,

Superintendent of Schools.

On April 1, 1913, there were in town 119 persons, between the ages of 5 and 21 years, an increase from last year.

I have a few supplies left over, also a few new books, that

I have kept in my desk, instead of having them knocked around in an old box at the school building. I would like to have my successor call for registers, record book, supplies, etc.

I wish to thank the scholars of the town for the courtesy with which I have always been received. I have enjoyed the work, and hope that it has not been wholly without gratifying results.

Very respectfully

MRS. JENNIE A. STANLEY,

Superintendent of Schools.

STATE OF MAINE

State Superintendent of Public Schools
Augusta

THE NOON INTERMISSION

The following resolutions were passed unanimously at the Conference of School Superintendents at Castine in July, 1913. It is suggested that these resolutions be given the widest possible publicity through school reports and otherwise so as to promote the practice of teacher supervision of pupils at noon.

Whereas, the noon hour frequently becomes a source of menace to the moral and physical development of school children and is often an occasion for the wanton destruction of school property.

BE IT RESOLVED:

First: that superintendents of schools and superintending school committees when engaging teachers shall make arrangements for them to remain at their schools during the noon hour in all cases where it is required that children shall be away from their homes and at school during that period and when other suitable adult supervision is not available and that recognition of this additional service be made in adjusting the salaries of teachers so employed.

Second: that in all cases where children go to their homes during the dinner hour there be a requirement that they remain away from the school premises until within fifteen minutes of the opening of school.

Third: that parents be urged to pay closer attention to the provision of suitable material for the noon lunch and that

teachers be aided in their efforts to make of the noon time school meal an exercise for the teaching of neatness, hygiene and table etiquette.

Fourth: that the recreation periods of the children in all schools should have the personal supervision and oversight of the teacher or other responsible adult.
