NEWSLETTER

We got some cool tools!

I've been working with David Rackliff for a while now to look into purchasing drills and sawzalls. Hammond Lumber had a great sale over Christmas, so both departments now have their own set up of drills, bits, batteries and massive sawzalls with blades. I'm working on arranging the charging stations and getting things charged and squared away on the pumps. Let me know if you'd like a tutorial on how to use everything!

Thank you David R. for the help!

The Islesford Ambulance will be boasting a new StatPack backpack soon! The green jump bag is showing its age, so I ordered a new backpack to help us carry gear more easily. Cranberry already has a StatPack that has been working well! I'll let you know when it arrives and we can go over the new jump kit.

The DEF sending unit was finally replaced on the Great Cranberry pumper on 1/4/19. The truck had a check engine light and a derate code for some time while we worked to diagnose the issue.

Daigle and Houghton mechanic, Kendall, came out twice to fix the problem and completed the work on 1/4/19. He recommends that we complete a forced regen on the truck once annually to help maintain the emissions systems since we cannot run the truck hot enough on the island. I will work with Daigle & Houghton to complete this work as it requires dealer software to complete the manual regeneration.

SAVE THE DATES!

OSHA & CPR TRAINING

New Date TBD for February.

My apologies for all the changes!

Town Meeting

Saturday, March 16, 2019

Great Cranberry Island

WILDERNESS EMT Class on Islesford!

Tentatively, APRIL 18-21 2019!

More info to come!
